3D GAME ART / REAL-TIME PRODUCTION

Oscar Anwar.

Characters, props & worlds.

6+ years in 3D production.
Sole 3D artist on Dummy Pirates: Ocean Tales, released on Steam.

Dummy Pirates: Ocean Tales / original team promotional artwork.

Portfolio & production breakdowns

zamrart@yahoo.com

DUMMY PIRATES: OCEAN TALES / 01 OF 04

Dummy Pirates: Ocean Tales

Released on Steam / PC game / Good Place Games / contribution: Jan 2022 - Jun 2023

Original team promotional artwork / Good Place Games. Steam Early Access: April 2023. Full release: November 2024.

View full project

MY RESPONSIBILITIES

Ships, characters & environments

Modeling & texturing

VFX, shaders & animation

Game direction & art planning

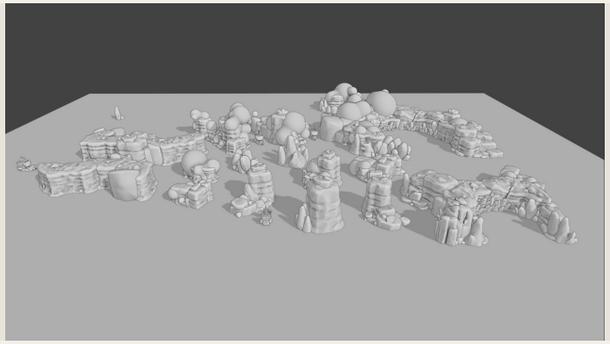

I was the sole 3D artist in the six-person team, working across the visual production and the design systems that connect it.

View on Steam

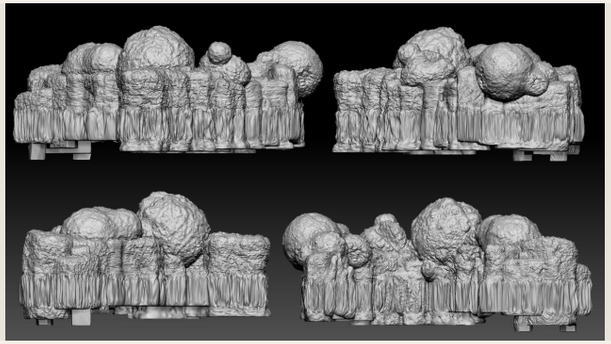

DUMMY PIRATES: OCEAN TALES / 02 OF 04

Dummy Pirates: Ocean Tales

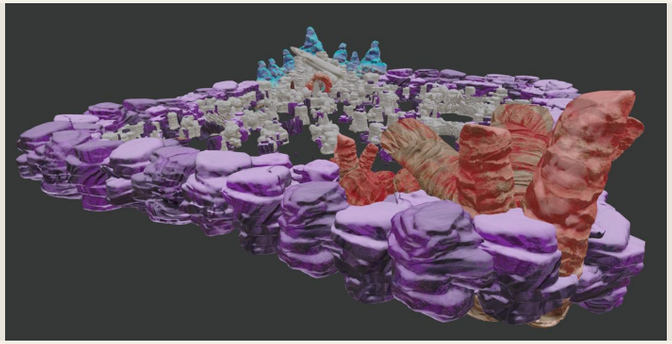

Production / modular environments and ship families

Environment kit / original graybox.

Modular rock topology / original screenshot.

Surface treatments across the environment kit.

Germ Pirates ship / finished model and views.

The project gallery includes additional ship families, a ship wireframe, surface tests, and texture inspection.

View full project

DUMMY PIRATES: OCEAN TALES / 03 OF 04

Dummy Pirates: Ocean Tales

The game in context / effects, abilities, and player information

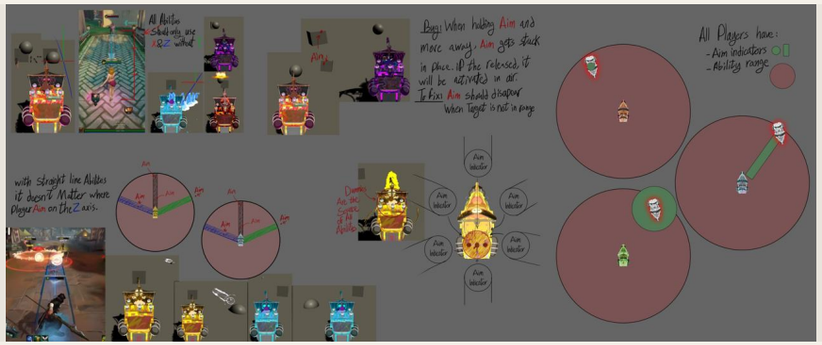

Ships, environment, and stylized water.

Original combat-effects development capture.

Lobby composition and ship selection.

Ability planning and range diagrams.

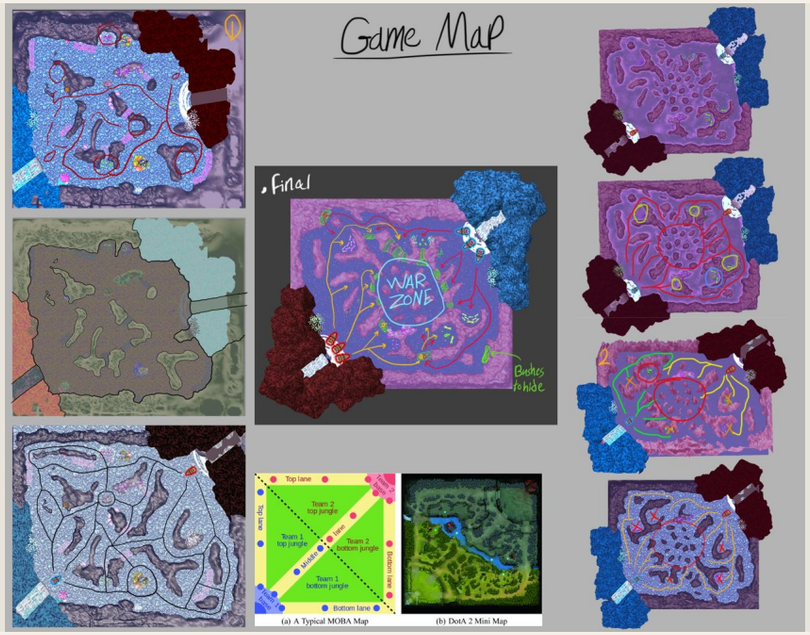

Original project captures and working boards. Reference icons in design documents are not presented as original icon artwork.

DUMMY PIRATES: OCEAN TALES / 04 OF 04

Dummy Pirates: Ocean Tales

Planning the game / scope, space, and player actions

Map iterations compare routes and regions; the tutorial sketch connects player actions to their place in the world. Scope notes, ability boards, team feedback, and historical roadmaps sit alongside these images in the project archive.

Planning documents show the development process. Proposed features and roadmap dates are not claims of shipped functionality.

TORUM / AR CHARACTERS / 01 OF 03

Torum / AR Characters

AR production / a collection of characters, expressions, and accessories

A large AR character-production project: multiple character collections, expressions, accessories, real-time rendering, and application presentation.

Modeling, texturing, blendshapes, and Unity implementation, including shaders, lighting, and post-processing. The role also included workflow research, outsourced-art feedback, and collaboration on optimization and tooling.

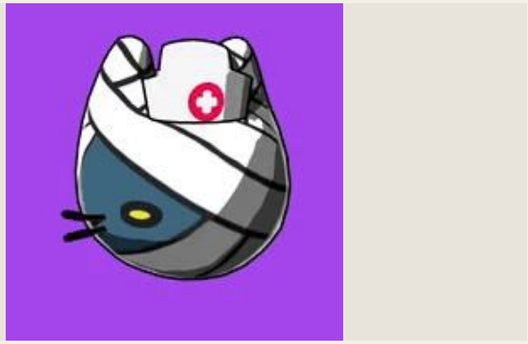

Torum Technology Sdn. Bhd., 2023–2024. Referenced character brands belong to their respective owners.

TORUM / AR CHARACTERS / 02 OF 03

Torum / AR Characters

The range / distinct silhouettes and surface styles

Cool Cats

Meebits

Moonbirds

Pudgy Penguins

Sappy Seals

Moonbirds / accessory variation

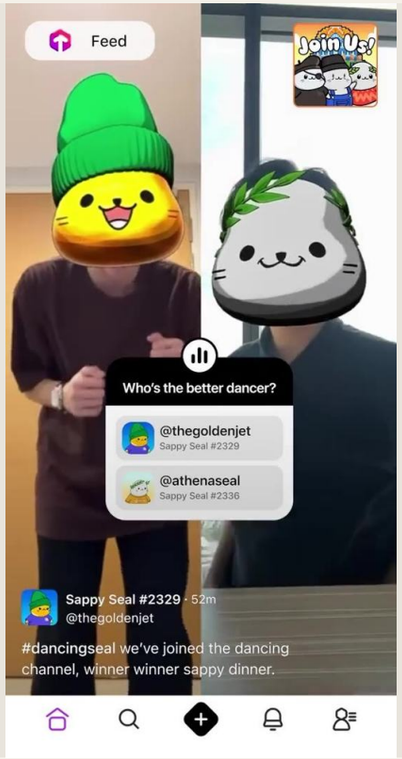

A selection from twenty original character-variation animations, available together on the project page.

View full project

TORUM / AR CHARACTERS / 03 OF 03

Torum / AR Characters

From character asset to application / expression, rendering, and integration

Original application recording: face filters in use. This is team product context.

The project connects multiple character styles to an interactive AR experience. My work included character assets, blendshapes, shaders, lighting, Unity integration, and production review.

Full motion gallery: five character families, twenty variations, plus two application and collection recordings.

ISLAMIC HELMET / 01 OF 01

Islamic Helmet

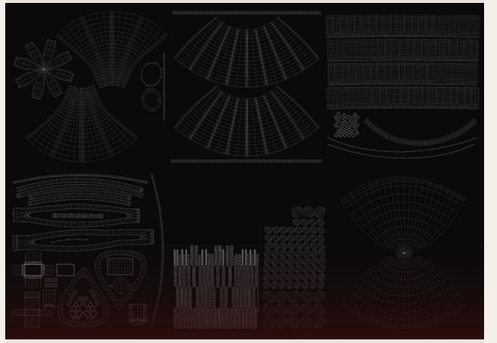

Prop art / one form, four surface stories

Clean metal, rust, moss, and blood treatments compare surface narratives on the same helmet. Original detail renders and UV layout.

View full project

SONIC SIDEKICK / 01 OF 02

Sonic Sidekick

Character presentation & final turnaround

Original finished character presentation.

MY CONTRIBUTION / FOCUS

Character development, material variations, turnarounds, and animated shots.

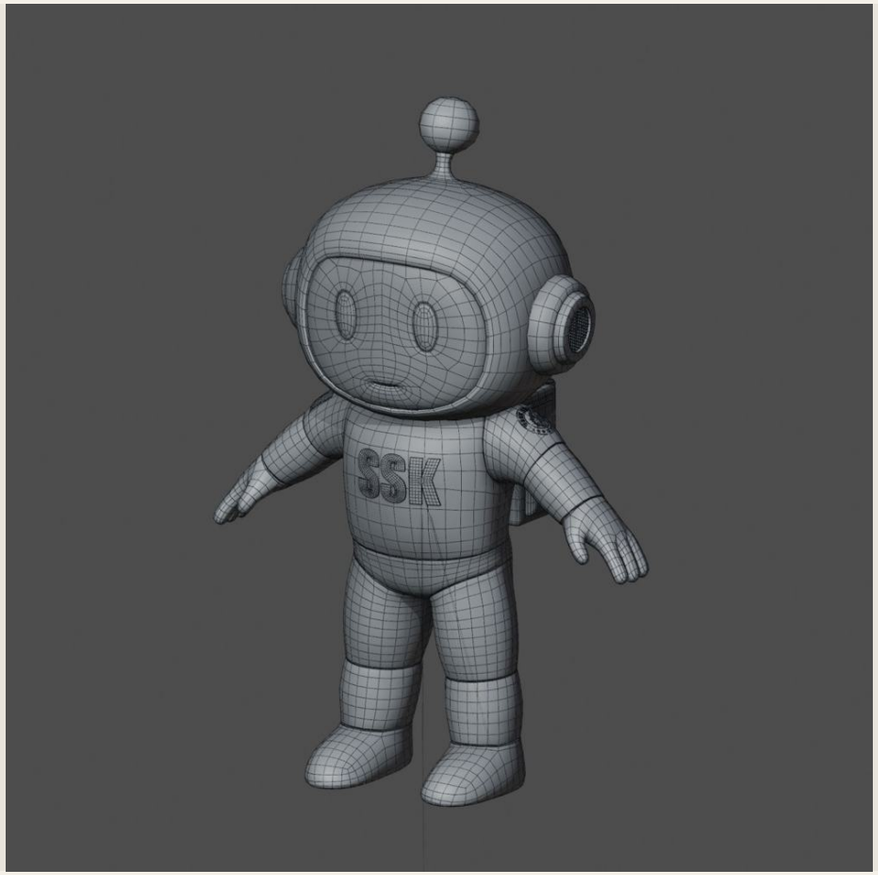

Client character and branding: Stemz / Sonic Sidekick.

View full project

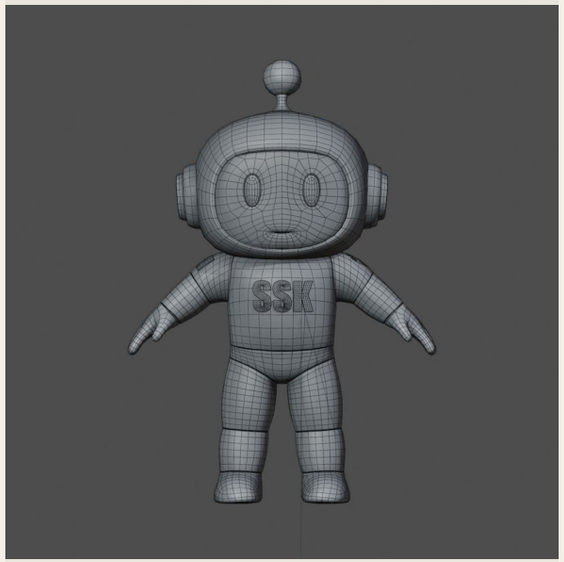

SONIC SIDEKICK / 02 OF 02

Sonic Sidekick

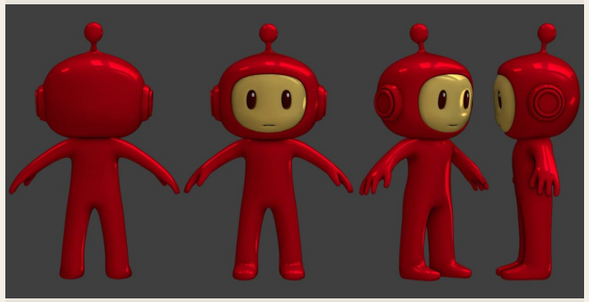

Mesh construction & color development

Actual mesh from the original Blender scene. Wire overlay follows the model edges; subdivision disabled for legibility.

Palette tests compare red and blue-purple treatments around the same mascot.

DEADDA / 01 OF 03

DeadDa

Graduation short film / The One Academy / 2023

Original lighting study from my portfolio archive. Characters and environment are part of the team production.

View full project

MY CREDITED ROLES

Environment modeling

Texture and shading

Look development

Lighting

Rendering

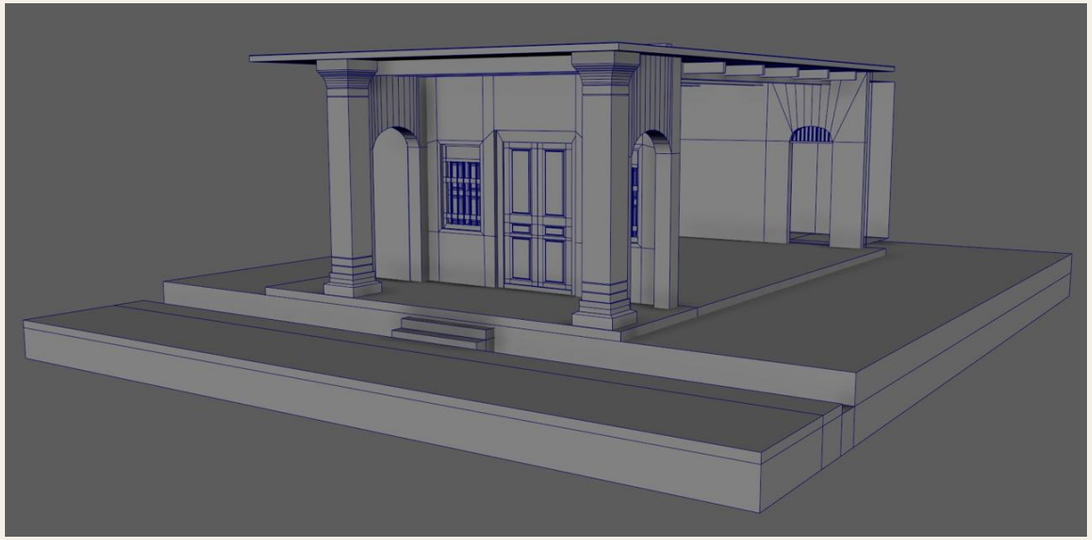

A clinic owner receives an unexpected visitor as he prepares to close. My graduation film brought together a large team across the production pipeline.

Watch the full film / 5:33

DEADDA / 02 OF 03

DeadDa

Clinic development / architecture, surfaces, and scene context

FROM STRUCTURE TO SURFACE

The architectural blockout establishes the clinic proportions. Isolated look-development views show its doors, signs, furniture, and material treatment before the final scene context.

Original team development images from the graduation-project archive. Exterior look-development source credit: IshaSiva. My credited roles include environment modeling and surface development.

View full project

DEADDA / 03 OF 03

DeadDa

Lighting development / scene variation and close-up mood

Seated views explore the doorway, candlelight, and character illumination. A warm close-up creates a more intense mood. Original lighting studies from my archive.

Team film: Krik Krak Production / The One Academy. Director: Tan Hui Ci. Producers: Yashawinie Siva Prakesh and Woon Zi Qi. Full team credits accompany the film.

AL SHAMEL / 01 OF 04

Al Shamel

The brief: a client-supplied AI concept, rebuilt as a complete rigged 3D character

Original finished character: front and back.

Additional poses: AI-assisted presentation interpretations.

I built the character from scratch: modeling, topology, clothing, UVs, textures, fur, and rigging. The client supplied the visual concept; I translated it into a functioning 3D character.

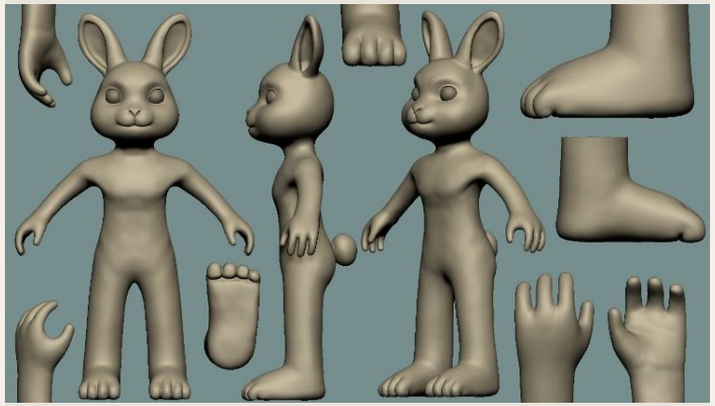

View full project

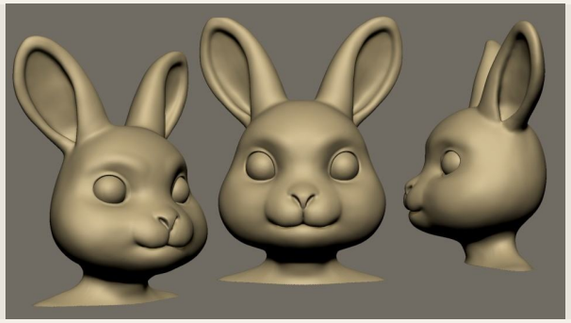

AL SHAMEL / 02 OF 04

Al Shamel

Proportions, clothing patterns, and fit revisions

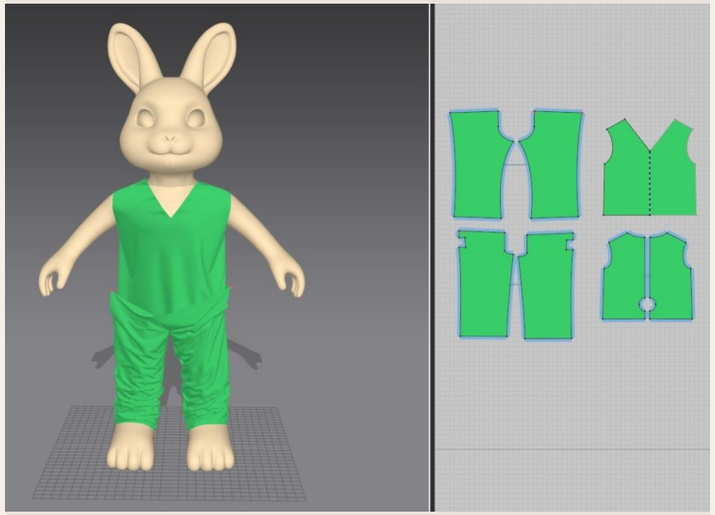

01 / SHAPE

Multiple views resolve the ears, muzzle, body proportions, hands, and feet.

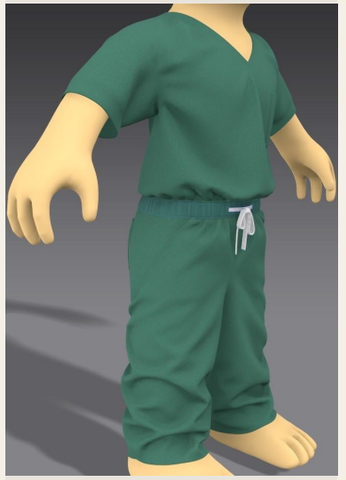

02 / CONSTRUCTION

Flat pattern panels alongside the first clothing fit on the character.

03 / FIT REVISION

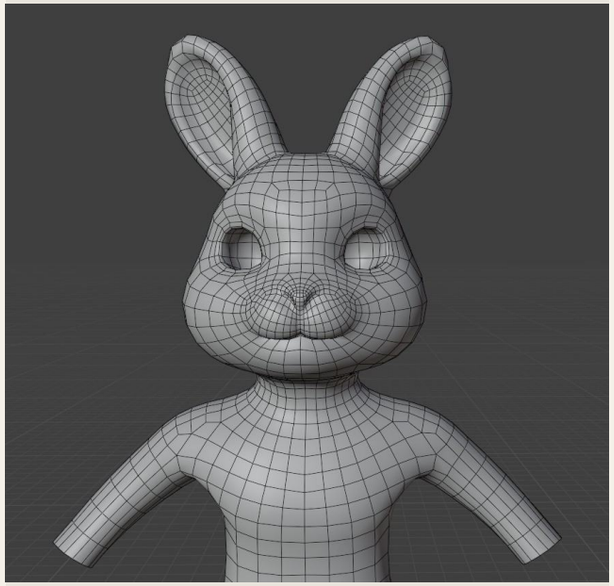

Gathered-waist iteration to separate scrubs with a drawstring waist.

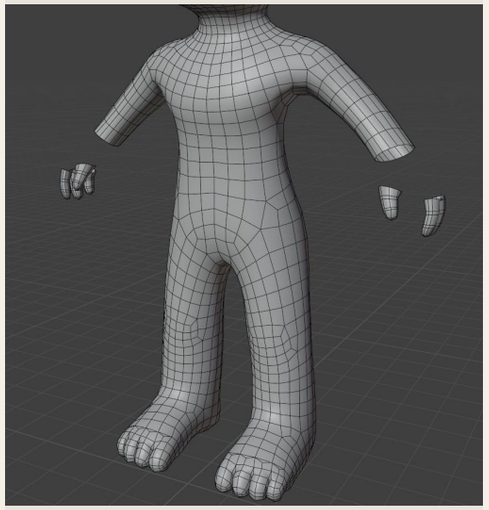

AL SHAMEL / 03 OF 04

Al Shamel

Original topology, facial construction, and UV inspection

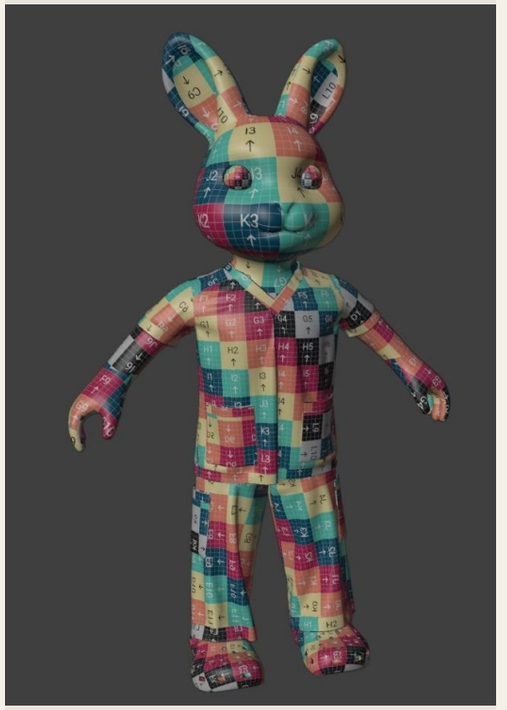

Head loops around the eyes, muzzle, and ear bases.

Body mesh and separate finger components during development.

Dressed wireframe, including clothing and footwear.

Checker inspection across body, ears, and garments.

All images on this page are original progress screenshots from my character production.

View full project

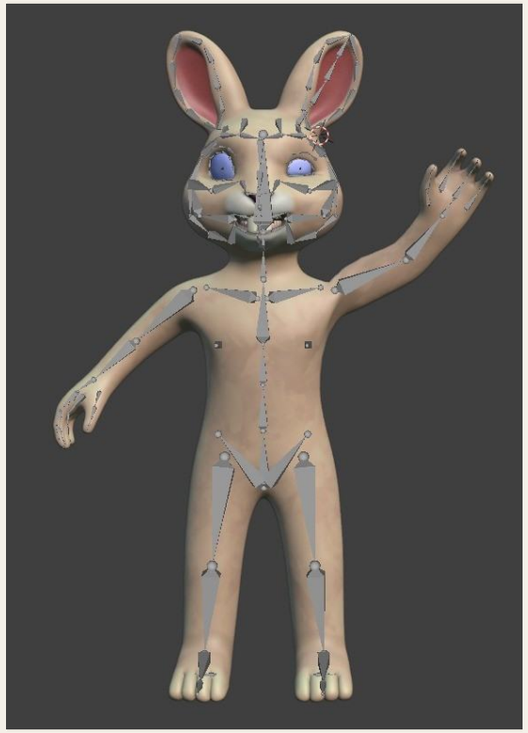

AL SHAMEL / 04 OF 04

Al Shamel

Surface development, expression, and rig tests

FUR & EXPRESSION

Fur, eye treatment, and facial expression bring the original forms into the final look. The close views make surface changes easy to compare.

RIG DEVELOPMENT

I built the rig as part of the complete character. Original control and pose-test screenshots document development; clothing intersections remain visible in the test pose.

FLOKI | VIKINGS / 01 OF 02

Floki | Vikings

Personal fan art / a younger, serious Floki

View full project

THE DIRECTION

I considered different versions of Floki before choosing a younger, serious interpretation for its intensity and charisma.

I created this Floki character study, from the sculpted forms to the finished character presentation.

Personal fan art by Oscar Anwar. Floki and Vikings belong to their respective rights holders.

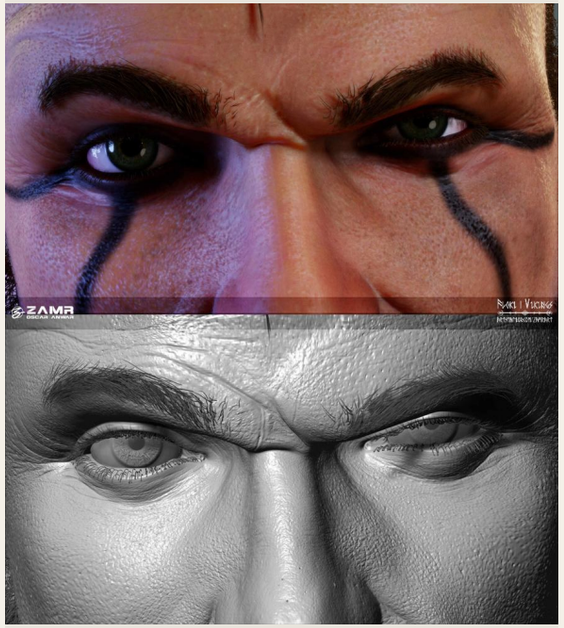

FLOKI | VIKINGS / 02 OF 02

Floki | Vikings

Sculpt, surface, and character detail

Original clay presentation: the complete silhouette, costume, pose, and head.

Facial clay and texture comparison.

Eye assets, clothing, hand, and axe detail.

Watch the modeling demoreel

View full project

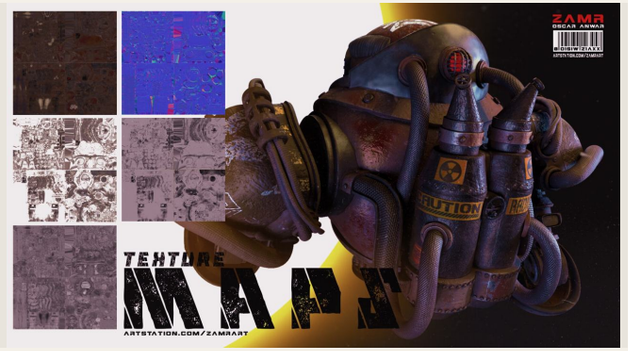

AKHTAR WILL RISE! / 01 OF 01

Akhtar Will Rise!

Character art / armored cyborg construction and surface development

3D character art, hard-surface modeling, surface development, and presentation.

Original finished presentation, component development, and material breakdown.

View full project

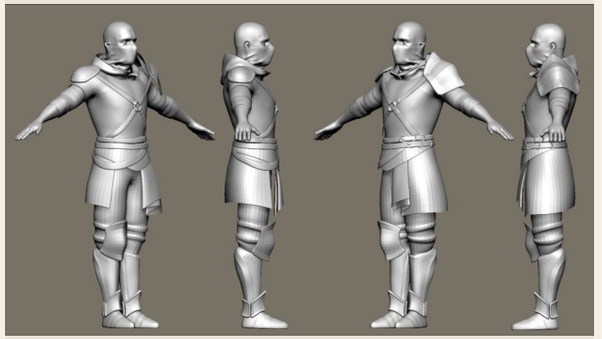

ARVEX / CHARACTER DEVELOPMENT / 01 OF 02

ARVEX / Character Development

Character development / silhouette, costume, and surface

Character development follows silhouette and costume through to surface treatment. The original progress views retain the unfinished stages.

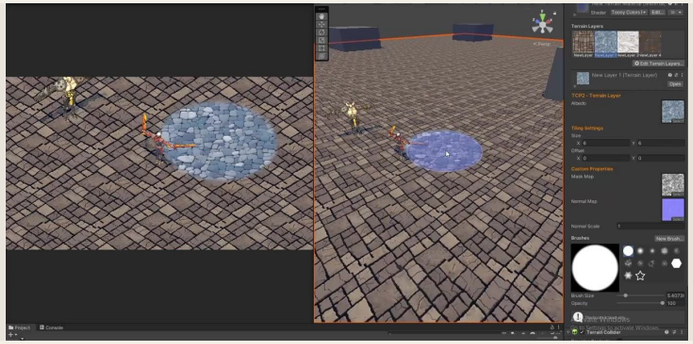

Bone Crusher / original character render.

View full project

ARVEX / CHARACTER DEVELOPMENT / 02 OF 02

ARVEX / Character Development

Real-time development / lighting, combat effects, and world blockouts

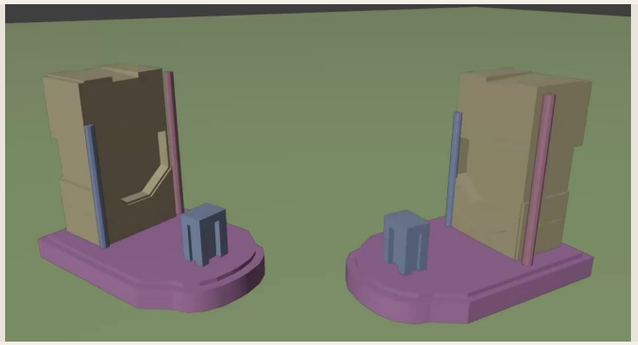

Lighting comparison in the original editor recording.

Projectile effect and directional feedback.

Combat-effect development in the game view.

Building blockout / later development.

Frames from original recordings. The website includes ten additional playable development excerpts.

View full project

MEDIEVAL BLACKSMITH / 01 OF 01

Medieval Blacksmith

Environment art / the workshop across finished views

Modeled in Maya and ZBrush, textured in Substance Painter, and rendered in V-Ray.

Original alternate workshop renders.

View full project

ENVIRONMENT STUDIES / 01 OF 01

Environment Studies

Environment studies / small commissions and lighting experiments

Urban building / four original views of the small freelance architectural-modeling project.

Throne room / the central aisle and closer composition.

View full project

PROPS & MATERIAL STUDIES / 01 OF 02

Props & Material Studies

Props & materials / a weathered telephone booth

The telephone booth brings modeling, worn surfaces, layered signage, and colored lighting together in one finished scene.

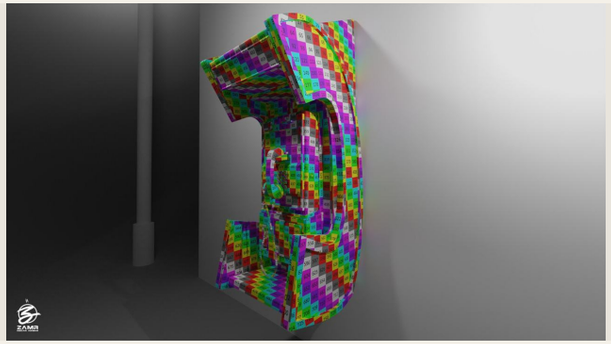

Original scene and close-up renders.

View full project

PROPS & MATERIAL STUDIES / 02 OF 02

Props & Material Studies

Construction, surfaces, and smaller prop studies

Telephone booth / original UV checker inspection.

Telephone booth / material-development board.

Armor study / construction and presentation.

Norman helmet / shell, decoration, and mail.

The complete gallery also includes texture maps, clay-to-surface animation, lanterns, furniture, and organic prop studies.

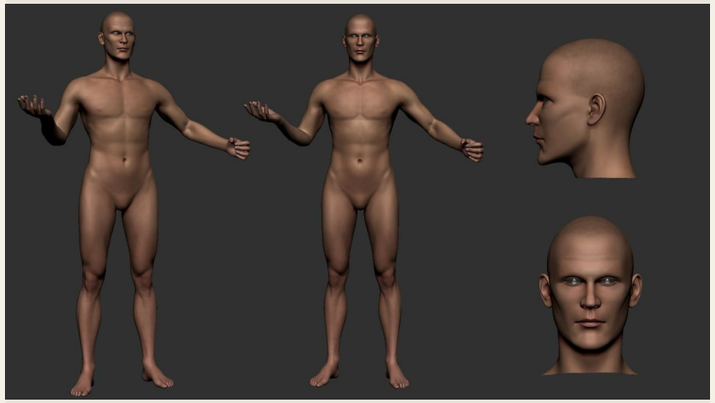

View full project

SCULPTBOOK / 01 OF 01

Sculptbook

Sculptbook / character and organic form studies

A collection of character, anatomy, and organic form studies. The full gallery keeps each original study available to inspect.
